RIVER TEES PORT HEALTH AUTHORITY.

To THE CHAIRMAN AND MEMBERS OF THE
RIVER TEES PORT HEALTH AUTHORITY.

Mr. Chairman, Ladies and Gentlemen,

I have the honour to place before you my report for the year 1961.
This is a report of, on the whole, a quiet year.

I want to thank the Members of the Authority for the kind and understanding support that they have given me throughout the year; to thank Mr. H. L. Cartwright, your Clerk, for his never-failing courtesy and help; to draw attention to the faithful work of your inspectorial, rodent operative and launch staffs; and finally, to acknowledge the kindness and co-operation which we have had from the Harbour Master and his staff, the Customs Water Guard, the River Tees Pilots, the Ship-Owners and Agents and the Captains and Officers of the many ships dealt with.

I have the honour to be,

Mr. Chairman, Ladies and Gentlemen,

Your obedient Servant,

ERIC C. DOWNER,

Medical Officer of Health,

River Tees Port Health Authority.

SECTION VIII.—VENEREAL DISEASE.

No CHANGE.

MERCHANT SEAMEN TREATED AT THE SPECIAL TREATMENT
CENTRE, MIDDLESBROUGH GENERAL HOSPITAL DURING 1961.

(Kindly supplied by the Consultant in charge).

During the year 1961, the number of seamen receiving treatment or investigation for venereal disease at this clinic continued to rise to a total of 236 an increase of 22% over the previous year. The cases are sub-divided as follows :

British Seamen	102
British Commonwealth	41
Foreign Seamen	93

Of the above number, 201 cases gave a recent history of exposure to possible infection and received initial investigation and treatment at the clinic. The total number of cases attending have been classified by country and in cases of fresh infection by disease.

The incidence of acute gonorrhoea in merchant seamen attending doubled over the previous year.

It is noteworthy that during the year 19 male cases of gonorrhoea showing varying resistance to antibiotics were dealt with at the clinic and of those cases 15 were M.N. seamen who had acquired their infection in Brazil and had been treated aboard their ships by non-medical personnel with a variety of antibiotics drugs in a variety of doses varying from a few hundred thousand units to several million. This practice would seem to indicate how resistant strains of Gonorrhoea are being introduced into the British ports and it would be wise to ensure that all seamen who have been treated for suspected venereal disease aboard ships, on arrival in port should go to an authorised V.D. Centre for examination.

Dr. R. Taylor, Deputy Medical Officer of Health.

Dr. M. Sackwood (to 28.2.1961) Senior Assistant Medical Officer of Health).

Dr. W. J. Wigfield (to 28.2.1961) do.

Dr. J. E. H. Tullis (from 1.5.1961). do.

2. List of other staff engaged in the work.—None.

3. Organisation of work :

The Port Medical Officer is notified of all alien passengers, including stowaways arriving in the Port and arrangements are made for a medical officer to examine them on board before they are allowed to disembark.

4. Nature and amount of aliens traffic :

The majority of alien passengers arriving in the Port are pleasure visitors to this Country, chiefly from the Scandinavian countries. A number also arrive regularly from Denmark bound for the Far East. These passengers are granted temporary shore leave during the vessel's stay in Middlesbrough. Stowaways occasionally arrive from West African ports.

The total number of alien passengers arriving in the Port during the year was 572 (including temporary shore leave passengers).

5. Accommodation for medical inspection and examination :

Aliens are generally examined on board, but accommodation is available at the Health Department, 26 Southfield Road, if it should be required. 561 alien passengers landed at the Port during the year. In addition 11 alien passengers not landing in Middlesbrough were granted temporary shore leave.

One stowaway was refused permission to land.

 SECTION XVI.—MISCELLEANOUS.

Arrangements for the burial on shore of persons who have died on board ship from infectious disease :

Dead bodies of persons who had died on board from infectious disease would be removed to the mortuary at West Lane Isolation Hospital, whence they would be buried.

LAUNCH "MERCIE II".

The motor launch "Mercie" II continues to give satisfactory service. The gear box was dismantled and removed to Gardner's representatives at Newcastle for a thorough overhaul and certain parts were renewed. It was the first time the gear box had been dismantled since the vessel was built in 1948.

FOOD INSPECTION.

Consignments of imported food have been systematically examined during the year. These consisted of : Ham, luncheon meat, Vienna sausage, butter, onions, lettuce, dried peas, lemons, evaporated milk, canned chicken, crab, salmon, pineapple, tomatoes, cucumber, pears, carrots, sugar, potatoes, cheese, tea, fruit pulp, gooseberries, syrup, sago flour, tapioca and desiccated coconut.

During the year 180 samples of desiccated coconut were taken from 37 cargoes. With the exception of one cargo these proved to be negative for salmonella contamination. Three bags from one cargo which were positive for salmonella contamination were condemned and destroyed.

PREVENTION OF DAMAGE BY PEST ACT, 1949.

Again, no rodent control certificates were issued during the year. All coasting vessels arriving in the Port were in possession of an international deratting or deratting exemption certificate.

The amount of shipping entering the Port during the year showed a decrease over the previous year : 3,054 ships against 3,502 in 1960. Comparison with 1938 is given below.

Arrivals			Net Tons	
1938	..	3,174	..	3,029,761
1961	..	3,054	..	4,932,587
